## PYTHON WEB DEVELOPER

### Executive Summary

I am a Python-Django backend developer. My knowledge and experience in development allows me to produce quality systems with different business logic. I have experience working in a team and alone, and I can freely adjust to the situation. My interest in development is great, which allows me to develop even faster. There are many good ideas in the world, but there are not enough developers for all ideas, and I want to help implement as many interesting ideas as possible

### Areas of Expertise

- Building Backend for Web and Mobile Applications: Django, DRF, Postgres, Nginx and more
- Writing data scrapers and parsers from web pages: requests, BeautifulSoup4, Selenium, regular expressions
- Creating Telegram Bot with different business-logic: Telegram-API, Aiogram, requests, SQLAlchemy, psycopg2
- Building metrics and connect it with Prometheus+Grafana for statistics
- Set up the server, github workflow, CI / CD, sentry (notification)

### Work Experience

#### JUNIOR PYTHON WEB DEVELOPER

NiceCode - Rostov-on-Don, Russia  
January 2021 - August 2021

- Creating Bots for company, like "System Checker Bot", it check server stats, database dumps, web-site availability and more
- Scraping data and parsing.
